Elliot Alderson

Cybersecurity Engineer

New York, USA · samsepi0l@elliot-alderson.dev · elliot-alderson.dev · github.com/elliot-alderson-dev

SUMMARY

Cybersecurity engineer who works out how systems fail, then rebuilds small things to understand them better. Writes about Astro, CSS, web performance and deployment.

EXPERIENCE

Cybersecurity Engineer · E Corp 2024 – now

- Work on the cybersecurity team at one of the world's largest conglomerates.
- Review access and harden internal systems across the company network.

Senior Cybersecurity Engineer · Allsafe Cybersecurity 2021 – 2024

- Protected client networks, with E Corp as the largest account.
- Investigated intrusions and responded to attacks on client systems.

Security Engineer · Amaya 2018 – 2021

- Worked in the encryption division of a San Francisco quantum computing company.
- Reviewed internal tools for security flaws before release.

SELECTED PROJECTS

- **astro-minimal-blog**: Starter theme with design tokens, flash-free dark mode and Pagefind search.
- **remark-read-time**: Remark plugin that adds a read-time field to Astro content collections.
- **linkcheck-action**: GitHub Action that fails the build when a static site has broken links.

SKILLS

Languages: TypeScript, JavaScript, Python, Bash
Tools: Kali Linux, Social-Engineer Toolkit, DeepSound, Raspberry Pi
Practices: penetration testing, incident response, web performance, CI/CD

EDUCATION

Self-taught · Mr. Robot computer repair shop
